**Subject:** Re: CDPHE please clarify what EPA 5 Year Reviews are missing for the Vasquez Blvd Superfund site

Jen.  
The five year reviews for VB/I-70 OU1 started in 2009. EPA completed the 2nd one in 2014 and we are due for the third one in 2019, which will be completed by the EPA this year.

Joan also requested we help publicize the CAG on our web-site. We told the CAG in previous correspondence that since neither the state or EPA are sponsoring/funding the CAG, as a policy we do not post outside groups meeting on our web page.

Do you want me to put together a short response for you?

Fonda

Fonda,  
I think the answer to this is that 5 year reviews are not missing, they haven't started yet. Can you please confirm?  
Thanks,  
Jen

Jennifer,

Before I submit comments regarding the EPA Notice of Partial Deletion for Operable Unit 1 of the Vasquez Boulevard and 1-70 Superfund Site in Denver, Colorado, would you please clarify what EPA 5 Year Reviews are missing? You state: "EPA and the State have determined that all appropriate response actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) have been completed, with the exception of five-year reviews."

Also, there are few documents for the public to review regarding the Vasquez Blvd Superfund site on the CDPHE website including misinformation that there are "no" community public meetings.

A "Citizens Advisory Group" for the VB/I-70 Superfund site meeting is scheduled for February 19th, 5:30-7:30, Focus Points Family Resource Center, 2501 48th Ave, Denver, CO 80216, USA

Your help to post updated information regarding the Vasquez Blvd Superfund site upcoming meetings, CDPHE VB/I-70 Superfund site reviews and comments, documents, and a clarification on the EPA missing 5 Year reviews are very important. I look forward to your response.

Thank you,  
Joan Seeman

Ms. Betsy Smidinger U.S. EPA Region 8 1595 Wynkoop St. Denver, CO 80202

**RE: CDPHE Concurrence of Partial Deletion of Vasquez Boulevard and 1-70 Superfund Site** Dear Ms. Smidinger:

The Colorado Department of Public Health and Environment (CDPHE) has reviewed the Notice of Partial Deletion for Operable Unit 1 of the Vasquez Boulevard and 1-70 Superfund Site in Denver, Colorado.

EPA and the State have determined that all appropriate response actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) have been completed, with the exception of five-year reviews. Furthermore, institutional/informational controls have been implemented for the 69 properties that refused access for sampling and/or remediation. EPA has worked with the City and County of Denver's Office of Clerk and Recorder to amend the title records of those properties with either a Notice of Environmental Condition or Notice of Potential Environmental Condition. CDPHE also sends

annual notices to both the owner and residents of the unaddressed properties within OU1. These controls ensure that current and future property owners and residences are aware that these properties were not addressed during remedial actions due to refusal of access.

Therefore, CDPHE agrees that all the necessary actions have been taken to delete Operable Unit 1 of the Vasquez Boulevard and 1-70 Superfund Site from the National Priorities List (NPL).

If you have any questions, please call me at (303) 692-3403.

Sincerely,

Jennifer T. Opila, MPA  
Director  
Hazardous Materials and Waste Management Division
